

DEVANSH PATIL

Ahmedabad | devanshpatil2202@gmail.com | LinkedIn: [devansh-patil](#) | Github: [devanshh18](#) | +91 6351274320

PROFESSIONAL SUMMARY

AI and Data Science enthusiast with hands-on experience in data analysis, machine learning and data visualization, combined with strong understanding of business and management. Passionate about bridging technology and business to solve real world problems and make better business decisions.

CORE COMPETENCIES

Product Thinking • Data Interpretation • Problem Solving • Presentation & Reporting • Effective Communication • Teamwork & Collaboration

TECHNICAL SKILLS

Languages & Libraries: Python, Machine Learning, Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, SQL, React.js

Data Analysis & Visualization: Power BI, DAX, Exploratory Data Analysis (EDA), Advanced Excel

AI / ML: LangChain, LangGraph, RAG, Prompt Engineering, Agentic Workflows, Pinecone, HuggingFace, Vector Embeddings

Backend & Deployment: FastAPI, PostgreSQL, MySQL, REST APIs, AWS, Docker

Tools & Platforms: Claude Code, Antigravity, Jupyter Notebook, Google Colab, Git, GitHub, Databricks

EXPERIENCE

Data Science Intern - Amnex Infotechnologies, Ahmedabad

May 2026 – Aug 2026

- Assisted in the development and enhancement of AI/ML modules, gaining hands-on exposure to real-world data science workflows and project environments.
- Supported experimentation with existing deep learning models for agriculture-focused use cases, including understanding model workflows, domain requirements, and potential improvements.
- Contributed to AI-focused modules involving Generative AI, RAG, agentic workflows using technologies such as LangChain and LangGraph.

PROJECTS

Krishiv - Greenhouse Intelligence System | [Github](#)

June 2026

- Built a real-time greenhouse monitoring platform with an IoT simulator feeding 19 sensor parameters into 3 Gradient Boosting ML models that predict plant health, disease risk, and irrigation needs with ~80% accuracy.
- Engineered 7 domain-specific features from raw sensor data and integrated a rule-based recommendation engine that generates actionable agronomic alerts based on model outputs and environmental conditions.
- Developed a FastAPI REST backend with PostgreSQL storage powering a React dashboard with live gauges, trend charts, and health breakdowns; containerized the full stack with Docker Compose for one-command deployment.

Student Performance EDA & Risk Prediction | [Github](#)

May 2026

- Conducted end-to-end analysis on a student dataset using MySQL and Python, uncovering critical risk factors including past failures, study habits, and parental education through SQL queries and EDA visualisations
- Built an interactive two-page Power BI report with KPI cards, visuals, and dynamic slicers to identify and segment at-risk students across key performance indicators.
- Predicted student pass/fail outcomes using logistic regression with scikit-learn at 88.6% accuracy, identifying at-risk students based on mid-term grades and behavioural indicators before the final exam.

Multi Region Retail Sales Performance Dashboard (Power BI) | [Github](#)

March 2026

- Analysed multi-region retail sales data to identify trends across product categories, customer segments and geographic areas.
- Designed and developed interactive Power BI dashboards using Power Query and DAX to track key metrics such as total sales, orders, customers, and average order value.
- Interpreted data visualizations to highlight product performance, regional sales distribution, and customer contribution patterns.

- Built a full-stack conversational analytics platform that transforms uploaded CSV datasets into interactive dashboards with LLM-generated KPIs, visualizations, and business insights, along with exportable PDF/PPT reports.
- Implemented a Chat with Data assistant using Groq LLaMA-3, React, FastAPI, Pandas, and Recharts, enabling users to query datasets in natural language and dynamically generate charts, metrics, and analytical responses.

EDUCATION

PGDM - Data Science and Analytics

2025 – 2027

Narayana Business School, AICTE | Score: 74.80% (CGPA 7.48)

Bachelor of Computer Applications (BCA)

2022 –2025

Faculty of Computer Applications & IT, GLS University | Score: 65.20%

CERTIFICATIONS

Meta Data Analyst Professional Certificate – Meta

Databases and SQL for Data Science with Python – IBM

Python for Data Science, AI & Development – IBM

LANGUAGES

English • Hindi • Gujarati • Marathi
